MooviPAL

A regional integration, a national strength

Collection infrastructure with a national
dimension (17 depots) and a strong regional
settlement.

3 sectors of intervention

LOGISTICS, HORTICULTURE & INDUSTRY

A job expertise proven for 10 years in the horticultural sector. We have taken part in the MooviPAL® project, adapted to the industrial carpentry sector, **since 2015**.

4 SERVICES

COLLECTION & RELOCALISATION

Full management of your RTIs collection

From your shipments data, we manage the collection in stores, stacking and delivery back on site of your RTIs. We have a collection infrastructure with a national dimension. You receive on a daily basis a collection report.

Our haulage contractors collect your RTIs in stores and return them on regional depots. Finally, we organize the delivery back on your sites.

DATA-SERVICES

Self-management of movements of your RTIs

You declare your RTIs on our Web mode IT platform et your clients inform you when you can collect them.

Our Web mode IT platform is dedicated to RTIs self-management of movements and RTIs balance.

LOGISTIC SERVICES

Tailor-made services as storage, order preparation, sorting and stacking.

DISTRIBUTION

After studying your project, we are able to build a personalized logistics model for your products in France.
